

# ANGELO SANTIAGO

## Software Dev / Multi-agent AI Orchestration Specialist

### Professional Summary

Experienced Software Developer with 3 years of professional experience, specializing in Multi-agent AI Orchestration and Agentic RAG solutions. I combine strong software engineering fundamentals with cutting-edge AI tools and multi-agent orchestration frameworks to build applications that drive business efficiency. My expertise spans full-stack development, multi-agent system design, AI-enhanced workflow automation, and scalable data pipeline architecture using Claude, Codex, and OpenCode. This comprehensive focus ensures clients receive robust, intelligent solutions that deliver 40-60% faster development cycles while maintaining exceptional quality and reducing operational costs.

### EXPERTISE

- Multi-agent Orchestration & Agentic AI
- AI-Powered Automation
- Web Development
- Mobile Development
- Back-end Development
- AI Tools (Claude Code, Cursor, OpenCode)
- Data Engineering
- Workflow Automation
- SQL and NoSQL Databases

### REFERENCES

### Key Achievements & Business Impact

- Multi-agent Systems: Designed and deployed streamlined multi-agent systems for complex workflow automation
- Development Acceleration: Achieved 40-60% faster delivery cycles through AI-enhanced development
- Cost Reduction: Reduced operational costs by 30-40% through intelligent automation
- Productivity Gains: Delivered 25%+ productivity improvements through workflow optimization
- Scalability: Designed and deployed scalable cloud solutions handling business growth seamlessly
- Quality Assurance: Maintained exceptional code quality while accelerating development timelines

### EXPERIENCE

Software Developer | Expert Solution Outsourcing | 2022 - 2025

- Developed and deployed scalable web applications using React, Next.js, Node.js, and TypeScript
- Designed and implemented multi-agent orchestration systems powered by Agentic AI and RAG architectures
- Implemented AI-powered automation solutions using Zapier, N8N, and Google Cloud Functions
- Designed and maintained data pipelines and cloud architecture for optimal performance
- Leveraged AI development tools (Claude, OpenCode) to accelerate delivery by 40-60%
- Reduced operational costs by 30-40% through intelligent automation implementations
- Achieved 25%+ productivity gains through workflow optimization and automation

### EDUCATION

Don Honorion Ventura Technological University

**Bachelor of Information Technology**
